Can we add this to the PH&T agenda in April, or shall I just raise it as 'a speaker' for now?

Hi Julie thanks for the response, yes if you could possibly the information to the next planning meeting as I'm unsure of how to do it. I'm sure it helps present a good case for Ilminster and may help fund any future possibilities of on street charging. Many thanks have a good day and stay safe. Sincerely

H.

I apologise for my late reply as I've been on holiday for a few days.

Thank you for sending the link. It's very interesting to read about the available government grants for councils to use for residential parking, and I noted that these were large City, District, and County councils who have taken advantage of the offer.

May I suggest that you put this forward to the Planning, Highways & Transport committee meeting to ask for Town Council to support this idea and to approach our District Council to provide these on street charging points.

If you're not able to do that, I can speak on your behalf. Unfortunately, we're too late to include it in the meeting for March, but it could be included in the meeting to be held on 6<sup>th</sup> April. Just let me know what you would like to do.

Kind regards,

Julie Earp

Deputy Town Clerk

Hi Julie, hope you are well, I've done some further reading about charge points and thought this article might be of interest.

Sincerely yours

Good morning

Thank you for your message.

At this time, Somerset District Council are considering installing more electric points for cars across South Somerset. They have already installed one in the West Street car park and we are hoping to get more electric charging points in the future. <https://www.southsomerset.gov.uk/news/2020/7/south-somerset-district-council-paves-the-way-for-a-new-charging-network-for-electric-vehicles/>

You can see these charging points and commercial points on this link: <https://www.zap-map.com/live/>

As for electric charging points on lampposts, around 1,000 electric charging points have been installed on lampposts in London, which was the result of a process that started back in 2017, but as far as we know, hasn't expanded into the other counties just yet. This would be something we aspire to in the future as more people buy electric cars.

Kind regards,

Julie Earp

Deputy Town Clerk

**Subject:** Electric charge points.

Dear Sir/Madam,

I wish to enquire about the local councils position on the provision of electric vehicle charge points in the local car parks. I am changing to an electric vehicle soon and as I am unable to charge at home due to living in a flat at the mead, are you aware of the government funds set up to provide electric charge points in lampposts as far as I'm aware this is still available. The provision of charge points would also be of benefit to the economy of the town as it would allow increased tourism by electric vehicle users as well as benefitting the environment and levels of air pollution.

I look forward to receiving your reply.

Sincerely yours

Julie Earp  
The Mead.
