

Speed signs along Station Road

Can the council look into the present lack of 30mph speed signs in the town? presently there only seems to be signs at the entrance and exit to the town and this seems to be leading to excessive speeds through the B3168/Station road area.

Also with the planned February 15-19 closure for resurfacing could the council also look into other traffic calming measures to help with the excessive speeding down this road?

Thank you.

Speed signs along Canal Way

If SCC are responsible is it possible to have some 30mph signs displayed on some of the lampposts as speeding motorists are a real threat to all the many pedestrians who use that road eg schoolchildren, visitors to medical centre, Gooch building users etc.
