

Buggy Replacement Report

Can-am Traxter Pro HD8

Road legal with soft doors

This is the Can-am Pro HD8 which out of all the vehicles that we have tested over the last 6 months is far out winner. It has the capability of carrying out all the tasks that we need it to full fill with ease. It has a powerful petrol engine, that is slightly better for the environment than diesel, that will be able to tow the water bowser during the summer watering season and not struggle up Strawberry Bank and be able to get around the wood when the weather is at its worst. There will be a winch attached so that we can use it for self-rescue if needed and for pulling out heavy objects etc. It has a large rear flatbed with electric tilt as this will help when we are self-working and need to empty the bed as now on the current buggy we struggle! The vehicle itself is very comfortable to drive and for the passengers, it is easy to maneuver and will fit in and around some of the tight entrances we have.
