

Town or Parish Council Websites

Our Council website package is designed to meet the specific needs of Town or Parish Councils.

This includes committees, councillor bio's, publication and archive of agendas and minutes of meetings, local information, news, events, history, local organisations, etc.

The package includes everything you need for a web presence for your Town or Parish Council including an eye-catching CMS website and emails.

The website is developed in WordPress, the most widely used CMS product with over 60 million websites worldwide.

Sections of the website can be managed by different administrators. For example, the clerk manages pages for council meetings, agendas and minutes, a publicity person manages the What's On events calendar and news pages.
