

Canal bank improvements

Problem

The canal banks are slowly eroding over time and the water is encroaching into the footpath.

Solution

As suggested in the management plan, we are looking to improve about 25 metres of the bank a year. This is to reduce the amount of bank erosion and keep access along the bottom.

The best and most ecological / sustainable option is to use 'coir rolls' essentially a netted sausage of coconut fibre that is secured at the bank edge, this allows roots to grow through it while giving a stable edge thus reducing erosion. Stakes are placed at 1-metre intervals with brushwood faggots pushed into the water to make a sturdy base. The coir rolls are then secured on, to create the bank edge.

The coir rolls come in unplanted or pre planted. Pre planted is a lot more expensive. We can provide the stakes and brushwood from the coppice at Herne Hill so only the coir rolls need to be purchased.

Fig 1. Shows a cross section of installation of the coir.

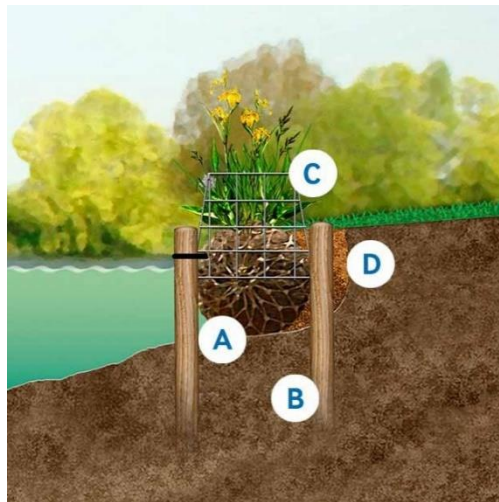

Fig 2. Shows the stakes and brushwood faggots that would be under the coir rolls.

In light of the current COVID-19 situation we are continuing to follow and monitor official guidance from the UK Government and Public Health England carefully, as such all lead times are subject to change. This quotation is valid for 30 days and is subject to the availability of product at the time of order.

Standard deliveries are on a 13.7m vehicle, with site responsible for off-load. Any special vehicle requirements or special delivery requests may incur additional charges and lead times

Yours Sincerely,

Greenfix Soil Stabilisation and Erosion Control Specialists

All prices subject to VAT

E&OE

- Credit Account customers to pay 30 days monthly account
- Non account customers subject to pro forma invoice with payment upon order
- Pre seeded and special products sold on a non return basis
- Subject to full Greenfix terms and conditions (please see website www.greenfix.co.uk)
- Standard materials, if returned, subject to re-stocking and carriage charges
- *Approximate delivery time period subject to change – See T & Cs on Website
- All Greenfix erosion control blankets, meshes, and mats are supplied as surface treatment. They are designed to assist germination and act as surface protection against initial surface erosion. All embankments and slopes must be inherently stable before installation of products.
- Failure to make Greenfix aware of any site or delivery requirements that result in a re-delivery will be liable to additional charge.

Squarespace

We do not supply unplanted coir rolls usually as we generally will use all our stock to create pre-vegetated rolls, we will however supply them at the same cost as planted rolls.

A pre-vegetated coir roll is £39.00 per meter and the rolls are supplied in 2m lengths so would you require 12 or 13 rolls?

Thanks

Jake
